TEA LEAF ROLLING MACHINE. [1961] [6]p.

Order from OTS or SLA \$1.10

61-18304

Trans. of Japanese patent 4409, appl. 8 Nov 1900,
approved 26 Nov 01.

DESCRIPTORS: •Tea, Processing machines, Design.

A tea-leaves rolling machine is described which consists of an iron cover with a chimney, and a double wire-gauze cylinder turning counter to the shaft, which has many spring plates on it, in order to effect a leaf-beating of row tea leaves. After the leaf-beating process, a split bamboo mat is inserted inside the half part of the cylinder and the tea leaves are rolled on the split bamboo mat by the action of the spring plates.
